ResMed’s AirFit™ F10 full face mask is part of ResMed’s AirFit range – the right fit for you. Its lightweight, streamlined design enhances comfort and ease-of-use, while its headgear and frame work in synergy, to deliver the same performance and stability you have grown to trust in a ResMed traditional full face mask.

Superior comfort
AirFit F10’s sleek, lightweight design gives patients the feel of lightweight on the nose and around the ears, while AirFit F10’s dual-wall Spring Air™ cushion provides a secure seal for better performance. When asked about AirFit F10’s seal and stability, the majority of patients we spoke to told us that it outperformed their ResMed traditional full face mask.

Ease-of-use
The mask’s four-part design makes it easy to demonstrate and for patients to take apart, clean and reassemble. Its intuitive design seamlessly integrates into your patient’s bedtime routine.

Fitting guide for AirFit F10

1. To ensure the cushion sits on the nose at, or below, eye level.
   - Pinch the side buttons near the center of the mask. Push the cushion down and pull the headgear towards the bottom of the mask.
   - The mask is now ready to use.

2. Optimal cushion positioning
   - Align the bottom of the cushion with the crease of the chin and the top of the cushion with the corner of the eye.

Additional options
- Position the lower part of the headgear over the ears. This helps maintain the adjustable position of the headgear along the forehead area.
- The mask is now ready to use.

Note: The information is subject to change. For more details, visit the ResMed website.
Quick to fit, easy to use

A recent ResMed study showed that the majority of patients could be set up and fitted with AirFit F10 in under two minutes. Thanks to its built-in simplicity and four-part design, the mask is also easier for patients to use—helping to reduce set back and ease time. You can be sure AirFit F10 is the right fit for your business.

AirFit F10 features and benefits

- Cushion-to-frame connection makes attaching the cushion to the robust frame easy.
- SoftEdge™ headgear is gentle on the skin and features premium rolled-edge fabric for reduced facial marking.
- Circular diffused venting keeps air away from the bed partner.
- Quick-release elbow with side buttons for fast detachment.
- Headgear loops make it easy for patients to detach and reattach the headgear.
- Dual wall Spring Air cushion provides a comfortable, high-performance seal.
- Enhanced Spring frame is lightweight and designed for stability, while offering unrestricted vision.
- Soft sleeves are packed with the mask for even more patient comfort.
